Book 2: Internet of Things and Big Data Analytics for Smart Generation

Outline

1 Theoretical Analysis of Big Data for Smart Scenarios 1
Vijender Kumar Solanki, Sandhya Makkar, Raghvendra Kumar and Jyotir Moy Chatterjee
1.1 Introduction 2
1.1.1 Understanding Big Data 3
1.1.2 Applications of Big Data Analytics 4
1.2 Emergence and Growth of Big Data Analytics 6
1.3 Adoption Approaches 7
1.4 Implementation Challenges 8
1.5 Big Data Under Considerations 9
1.6 Big Data Market 9
1.7 Conclusion 11
References 11

2 The Role of IoT and Big Data in Modern Technological Arena: A Comprehensive Study 13
Sushree Bibhuprada B. Priyadarshini, Amiya BhusanBagjadab and Brojo Kishore Mishra
2.1 Introduction to Big Data, IoT and Hadoop Ecosystem 14
2.2 Big Data Process 15
2.3 Big Data Ultimatums and Features 16
2.4 Types of Data Sources 19
2.4.1 Structured Knowledge 19
2.4.2 Unstructured Knowledge 19
2.4.3 Structured Versus Unstructured Data 19
2.5 Real World Applications of Big Data 19
2.6 IoT Architecture and Security Challenges 22
2.6.1 IoT Standards and Protocols 22
2.6.2 IoT Security Requirements 23
2.6.3 Single Points of Failure 24
2.7 IoT Code 24
2.8 Conclusion and Future Scope 24
References 25

3 The History, Present and Future with IoT 27
Neha Sharma, Madhavi Shamkuwar and Inderjit Singh
3.1 Introduction 28
3.2 Related Work 29
3.3 Internet of Things (IoT): Evolution 30
3.3.1 Definitions 31
3.3.2 History 32
3.3.3 Trends in IoT 33
3.4 Internet of Things: Present State 34
3.4.1 Present Communication Models 35
3.4.2 Present Architecture 39
3.4.3 Present Technologies 41
3.5 Discussion on Future of Internet of Things 43
3.5.1 Connected Devices 43
3.5.2 IoT for Hackers 44

3.5.3 Smart Cities 45
3.5.4 Secured Routers 45
3.5.5 Usage of Smart Products 45
3.5.6 App-Specific Device Ecosystems. 46
3.5.7 IoT for Businesses 46
3.5.8 Some Awesome Inventions 47
3.6 Conclusion 47
References 48

4 A Survey on IoT Based Traffic Control and Prediction Mechanism
Sourav Banerjee, Chinmay Chakraborty and Sumit Chatterjee 53
4.1 Introduction 54
4.1.1 Motivation 54
4.1.2 Application of IoT 54
4.1.3 Objective 55
4.1.4 Summary of Chapter 55
4.2 Design of Smart Traffic Management System Using IoT 56
4.2.1 Objectives of Intelligent Transport System 56
4.2.2 Techniques Used 56
4.2.3 Design of the Traffic Management System 57
4.2.4 Rfid 58
4.2.5 Algorithm Implemented in the RFID Controller 59
4.3 Role of Ontology in Context Aware Traffic Management 60
4.3.1 MOWL: An Ontology Representation Language 60
4.3.2 Algorithm Implemented to Avoid Congestion in Context Aware Traffic Management 62
4.3.3 System Architecture 63
4.4 Role of Android for IoT Enabled Emergency Traffic Signal Control 64
4.4.1 Hardware Specifications 64
4.4.2 Priority Resolving for Emergency Vehicles 65
4.4.3 Software Specification 65
4.4.4 Algorithm to Implement Easy Passage of Emergency Vehicles 65
4.5 Local Traffic Smart Server Based Traffic Framework 67
4.5.1 Data Processing in the Traffic Server 67
4.5.2 Algorithm to Implement Local Traffic Smart Server Based Traffic Framework 68
4.6 Application of IoT with Semantic Web for Intelligent Traffic Monitoring 68
4.7 Real Time Traffic Control Using Cloud Computing 69
4.7.1 System Design and Implementation 70
4.8 Conclusion 74
References 74

5 A New Encryption Scheme Method (ESM) Using Capsulated- Layers Conception for Verified QR-Tag for IoT-Based Smart Access Systems 77
Abbas M. Al-Ghaili, Hairoladenan Kasim, Marini Othman and Zainuddin Hassan
5.1 Introduction 78
5.2 The Proposed Encryption Scheme Method for (ESM) for Verified QR-Tag 79
5.2.1 ESM Block-Diagram 79
5.2.2 Introduction to the Proposed ESM 80
5.2.3 ESM Scenario 80

5.3 The Proposed Three Processes Verification Algorithm (3PVA) 81
5.3.1 Introduction—Overview 81
5.3.2 QR-Tag Contents Verification (QR-CV) 81
5.3.3 QR-Tag Expiry Time Verification (QR-ETV) 83
5.3.4 QR-Tag Related Database Verification (QR-DV) 84
5.4 The Proposed Three-Layer Protection Algorithm for Decision Making (3LPA) 85
5.4.1 Introduction into 3LPA 85
5.4.2 The Proposed 3LPA for Decision Making 86
5.4.3 3LPA Based Security Objectives Verification 87

5.5 The Proposed Three Layer Encryption Algorithm (3LEA) 87
5.5.1 Introduction to 3LEA 87
5.5.2 General 3LEA Equation 87
5.5.3 3LEA Equation Architecture 88
5.5.4 3LEA Equation—Security Layers Conception Definition 90
5.5.5 3LEA Equation Layers—The Proposed Layer-Security Conception 90
5.5.6 Secret Key Design 92
5.5.7 3LEA Equation Layers—Technical Definition 93
5.5.8 Mathematical 3LEA Properties 94
5.5.9 3LEA Processes 95
5.6 Performance Evaluation 97
5.6.1 3LPA Security Factor Based Evaluation 98
5.6.2 3LEA 98
5.6.3 ESM—Data Privacy and Security for IoT-Based Systems 101
5.7 Conclusion 102
References 102

6 Internet of Things Enabled Robot Based Smart Room Automation and Localization System
Rajesh Singh, Gehlot Anita, Shiv Capoor, Geeta Rana, Ravindra Sharma and Shivani Agarwal
6.1 Introduction 106
6.2 System Description and Hardware Development 108
6.3 Software Development and IoT 115
6.4 IoT implementation 116
6.5 XBee Configuration 119
6.6 Blynk APP Development 120
6.7 Result 121
6.8 Conclusion and Future Scope 123
References 132

7 Smart Cities & IoT: Evolution of Applications, Architectures & Technologies, Present Scenarios & Future Dream 135
Krishnan Saravanan, E. Golden Julie and Y. Harold Robinson
7.1 Introduction 136
7.2 Evolution of Smart Cities & IoT 137
7.3 Present Smart IoT (Applications, Architectures, Technologies) 138
7.4 Smart IoT Projects & Case Studies 144
7.5 Smart Cities IoT Standards 146
7.6 Smart IoT Future Challenges 147

7.7 Future of Smart Cities & IoT—Research Perspective 148
7.8 Conclusion 149
References 149

8 Evolution in Smart City Infrastructure with IOT Potential Applications 153
Rohit Sharma
8.1 World View of IOT 154
8.2 Smart Cities Architectures and IOT 155
8.3 Advancing IOT Is a Challenges in Cities 157
8.4 Smart City IOT Use Cases 157
8.4.1 Smart Parking 158
8.4.2 Smart Lighting 159
8.4.3 Smart Waste Management 160
8.4.4 Smart Fleet Management 161
8.4.5 Smart Energy Management 162
8.5 Development of a Smart City Affected by the Trends 162
8.5.1 Technical Trends 163
8.5.2 Internet of Things (IoT) 163
8.5.3 5G 167
8.5.4 Big Data 168
8.5.5 Cloud Services 169
8.5.6 Application Trends 170
8.5.7 Energy Services for Smart City 170
8.5.8 Smart Agencies and Administrations 171
8.5.9 Smart Resources 172
8.5.10 Smart Buildings 172
8.5.11 Health Care for Smart City 173
8.5.12 Digital Social Development with Smart City 173
8.6 Smart City Reference Model 174
8.7 Smart Cities and IOT Potential Applications 175
8.7.1 Communities and Smart Cities 176
8.7.2 Smart Buildings and Homes 176
8.7.3 Responsive Customers 176
8.7.4 Smart Grids and Smart Energy 177
8.8 The World Practical Experience 178
8.8.1 The Netherlands, Amsterdam 178
8.8.2 New York, USA 178
8.8.3 South Korea, Busan 179
8.8.4 Nice, France 179
8.8.5 Padova, Italy 179
8.9 IOT Smart City Fabric: Further Discussions 180
8.10 Recommendations and Conclusions 180
8.10.1 The Smart City Reference Model 181
References 183

9 Towards an Optimized Semantic Interoperability Framework for IoT-Based Smart Home Applications 185
Sivadi Balakrishna and M. Thirumaran
9.1 Introduction 186
9.1.1 Objective of the Proposed Work 187
9.2 Related Work 187
9.2.1 Ontologies and Standards 188
9.2.2 Mapping Technologies for Data Models 188
9.2.3 Data Integration and Exchange Systems 188

9.2.4 Semantic Annotations 189
9.3 Semantic Interoperability Framework 190
9.3.1 REST Crawler 192
9.3.2 Syntax Extractor 193
9.3.3 Ontology Matcher 193
9.3.4 Semantic Reasoner 194
9.3.5 Classifier 197
9.3.6 Correlation Analyzer 198
9.4 Implementation Architecture 199
9.5 Experimental Results and Analysis 203
9.5.1 Experimental Setup 204
9.5.2 Performance Measures 204
9.5.3 Performance Evaluation 205
9.5.4 Comparison of the Proposed Framework with Exiting Approaches 205
9.6 Conclusion and Future Work 210
References 210

10 Implementation Challenges and Opportunities of Smart City and Intelligent Transport Systems in India 213
Shajimon K. John, D. Sivaraj and R. K. Mugelan
10.1 Introduction 214
10.2 Intelligent Transport System Models 217
10.3 Implementation of Smart City Across the Globe 221
10.4 ITS Implementations Across the Globe 222
10.5 Smart City and ITS Implementation Initiatives—India 227
10.6 Conclusion 232
References 233

11 Detection of Personality Traits of Sarcastic People (PTSP): A Social-IoT Based Approach 237
Preeti Mulay, Rahul Raghvendra Joshi, Ayushi Misra and Rajeev R. Raje
11.1 Introduction 238
11.1.1 Research Background 239
11.1.2 Problem Statement 241
11.1.3 Aims and Objectives 241
11.1.4 Personality Detection Techniques 242
11.1.5 Techniques and Approaches for Sarcasm Detection 242
11.1.6 Rule-Based Approach 243
11.1.7 Supervised Learning Based Approach 243
11.1.8 Semi-supervised Learning Based Approach 244
11.1.9 Platforms for Machine Learning, Data Mining and NLP Tasks 245
11.1.10 Comparative Gist of Previous Work 245
11.2 Methodologies Used for Implementation of PTSP 245
11.2.1 Collaborative Methodologies 245
11.2.2 System Architecture of PTSP 247
11.2.3 Algorithm for the Implementation of PTSP 249
11.3 Implementation Details of PTSP 250
11.3.1 Hardware and Software Requirements 250
11.3.2 Feature Extraction for Sarcasm Detection 251
11.3.3 Feature Extraction for Personality Traits 251
11.4 Results and Discussion by PTSP 251
11.4.1 Time Variant Analysis of Sarcasm and Personality Traits 251
11.4.2 Gender Variant Analysis of Sarcasm

and Personality Traits 252
11.4.3 Situation-Based Analysis of Sarcasm
and Personality Traits 255
11.4.4 Performance Measure 257
11.4.5 Mapping Between Sarcasm and Personality Traits . . . 258
11.5 Conclusion and Future Directions of PTSP 259
References 259

12 Utilizing Big Data for Health Care Automation: Obligations, Fitness and Challenges 263
Sherin Zafar
12.1 Introduction 263
12.2 Key Business Healthcare Challenges 266
12.3 Big Data Challenges in Healthcare Automation 270
12.4 Data Analytics 272
12.5 Tools/Platforms for Utilizing Big-Data Analytics
for Healthcare Automation 274
12.6 Conclusions and Recommendations 276
References 276

13 IoT Based Intelligent Transportation System (IoT-ITS) for Global Perspective: A Case Study 279
S. Muthuramalingam, A. Bharathi, S. Rakesh kumar, N. Gayathri,
R. Sathiyaraj and B. Balamurugan
13.1 Introduction 280
13.2 Related Works 282
13.3 Smart Cities and IoT 283
13.4 Big Data and Its Challenges 286
13.5 V's of Big Data-An ITS Perspective 286
13.6 Challenges Faced by Big Data Technology 287
13.7 s-ITS System Overview and Preliminaries 287
13.8 Design Requirements of ITS System 288
13.9 Design Goals 288
13.10 Experimental Design 289
13.11 Implementation 292
13.12 Big Data Techniques in ITS 293
13.13 Classification of Multivariate Techniques 293
13.14 Experimental Results and Discussion 295
13.15 Conclusion and Future Work 297
References 299
